

# Cedar Split Rail Wood Fencing

## Components Per 10' Section

- All cedar lumber
- (1) Post: approximately 5-7"x5-7"x5 1/4' or 6 1/2'
- (2+) Rails: approximately 3-5" (rails are notched and inserted into post holes)

The cedar Split Rail fence style is an open space fence with two or three rails. This fence is popular on ranch properties and landscape designing projects or if a more rustic look is desired. Some customers even prefer having this fence installed between pillars on their property. The Split Rail Fence provides the same natural appealing look to both sides of the fence. Anticipated longevity for this type of fence is around ten years.
